JOB NOTICE

The Economic Research Department at the Federal Reserve Bank of Kansas City is recruiting for the position of Research Associate.

Research Associates assist senior staff economists on academic research projects and monetary policy briefings. Their responsibilities include gathering and analyzing data, preparing charts, and writing summaries of economic and financial conditions. More experienced Research Associates also participate in econometric or theoretical research, develop computer applications, write for Bank publications, and deliver speeches to civic and educational groups. The department has openings for Research Associates in each of the functional areas below:

Macroeconomics and Monetary Policy
Banking and Financial Markets
Payment Systems Research

These are excellent positions for someone considering a Ph.D. in economics or finance. Research Associates develop technical skills and are exposed to a broad range of economic research topics. Most Research Associates stay with the department for two years, at which point many return to graduate school.

Applicants should be completing a bachelor's or master's degree in economics or a closely related field, such as statistics, computer science, or mathematics. Successful candidates will have a strong academic record, high proficiency with personal computers and spreadsheet software, and excellent communication skills. Coursework or experience in econometrics, math, statistics, and statistical software packages is highly desirable. Applicants should send a cover letter, resume, and transcript to:

Paul Rotilie
