

## ***Immediate opening for PT coder***

Help needed with **Linux and Stata coding**, starting immediately,

**\$20/hour**

I am a graduate student in the economics department without a firm background in programming. I am looking for help from someone with a good knowledge of coding in Stata and using Linux to look through my past code and advise on how I could improve it, and to help me with writing code going forward.

The hours will vary, but I expect to need:

**5-10 hours per week**

***next 6-8 weeks***

If you could only work for some of this period that would be fine

If interested contact: **Stefan Hunt**
